RailEasy™ Nautilus Cable Railing System LEED Information

Recycled Content Defined:

"Pre-consumer" materials are generated by manufacturers and processors and may consist of scrap, trimmings and other by-products that were never used in the consumer market.

"Post-consumer" material is an end product that has completed its life cycle as a consumer item and would otherwise have been disposed of as a solid waste. "Post-consumer material" indicates the product was made with these materials that were recycled by residents and other businesses.

Subject Product:

RailEasy™ Nautilus Cable Railing System

Stainless steel cable railing systems are defined as all systems made by Atlantis Rail that include stainless steel tube railings. These may be with or without posts. Systems consist of 2" and/or 1-1/2" stainless steel tube, special cast fittings and 5/32" cable, cable tensioners, swivel ends, lag studs, stud assemblies and cable sleeves.
