FOR IMMEDIATE RELEASE  
October 14, 2016

## ATLANTIS RAIL'S SPECTRUM SYSTEM LAUNCHES NEW COLORS & DESIGN OPTIONS

*A cable railing to match any indoor or outdoor living space*

Plymouth, MA, October 14, 2016— Atlantis Rail is known for enhancing the beauty of the interior as well as exterior of their customers' homes. In order to provide customers with more options they are proud to announce several new advances to their Spectrum Cable Railing System including new colors options, ADA Handrail Mounting Bracket, Reinforcing Channel, and Wide Mounting Plate.

Previously the Spectrum System posts were only available in Black or Metallic Silver. Now their customers can choose from those as well as Pure White, Pebble Grey, Brown, or Deep Red. These colors will still feature pre-drilled square posts and fittings for surface or fascia mounting. Their customers will also be able to use either 5/32" or 1/8" cable with hand swage studs.

In order to accommodate their commercial customers' needs, they now provide an ADA Handrail Mounting Bracket. This bracket features a clamp that fits onto the Spectrum post and allows for the attachment of a handrail. These supports accept a 1-1/2" stainless steel handrail which allows commercial clients to be ADA compliant. These clamps are also powder coated to match the Spectrum post color in order to maintain the overall look that the customer desires.

If a project has a handrail that needs additional structural support, Atlantis Rail now offers a Reinforcing Channel. It fits over the Top Mounting Plate Assembly and screws can be mounted through the slots running the length of the channel and into the handrail. To maintain the look of the railing system, it is powder coated to match the Spectrum posts. The Reinforcing Channel is available in a 48" lengths and can be cut to size to fit any project.

For customers that would like a wider top rail, Atlantis Rail has developed the Wide Mounting Plate. This plate is twice the width of the standard mounting plate and is powder coated, like all their new components, to maintain the overall look of the Spectrum System.

Atlantis Rail Systems has a network of dealers throughout the United States that offer the Spectrum System and other quality Atlantis Rail systems and cable railing components. Please contact

an Atlantis Sales Representative to find a dealer near you or visit the Dealer Locator on the Atlantis Rail website. To learn more about Atlantis Rail's line of railing systems and components, please visit [www.atlantisrail.com](http://www.atlantisrail.com) or call (800) 541-6829.

Atlantis Rail is a leading manufacturer of premium stainless steel cable railing systems. This innovative collection of low maintenance railings offers unobstructed views capable of fitting any indoor or outdoor, commercial or residential design. They are designed for assembly using a collection of patented railing fittings and components to allow for the delivery of a turnkey stainless steel railing system at a low cost.
