FOR IMMEDIATE RELEASE

March 29, 2018

## ATLANTIS RAIL SHINES WITH NOVA NAUTILUS CABLE RAILING SYSTEM

Uncommonly Sophisticated & Uniquely Refined, NOVA Nautilus Puts a Shine on Any Deck

Plymouth, MA, March 29, 2018– Atlantis Rail’s Nautilus Railing System is nothing new. It has been a customer favorite for years. They have now teamed the Nautilus System up with their new NOVA II aluminum post kits to create the NOVA Nautilus System and it’s stunning. It is even more affordable and easy to install.

The NOVA Nautilus System utilizes predrilled aluminum posts with a 2” stainless steel top and optional bottom rail. It features multiple color options of black, white or bronze to compliment any application. The rails are structural strength stainless steel so it can be configured with a top rail only or a bottom rail can be added. Cable spacing at 2-3/4” allows the posts to be spaced up to 6’ apart when using a cable stabilizer in the middle which further reduces the cost and expedites installation.

A proprietary sidemount fitting with an insulating gasket is used to mount the rails to the post, eliminating concern about potential issues in combining dissimilar metals. HandiSwage™ components hide the cable connections inside the post and the easy to use swage tool and cover nut sets provide an easy install and a finish look.

Atlantis Rail Systems distributes cable railing and glass railing systems through a network of value added distributors and dealers located throughout the United States and Internationally. Please contact an Atlantis Sales Representative to find a dealer near you or visit the Dealer Locator on the Atlantis Rail website. To learn more about Atlantis Rail’s line of railing systems and components, please visit [www.atlantisrail.com](http://www.atlantisrail.com) or call (800) 541-6829.

Atlantis Rail Systems is a leading manufacturer of premium stainless-steel cable and glass railing systems. Their prefabricated, modular railing systems are designed for assembly using a collection of patented railing fittings and components to allow for easy installation at a low cost. Their systems are ideal for commercial and residential, indoor and outdoor applications.
